

Graphic Design Computer Requirements

Requirements

As a student in the BFA Graphic Design Emphasis or BA with Graphic Design Concentration you will need a Macintosh Laptop Computer capable of operating the most up to date versions of the Adobe Creative Cloud.

Students are also required to purchase a subscription to the Adobe Creative Cloud.

Recommendations

It is the recommendation of the Graphic Design faculty that you purchase the best possible computer that you can afford. This computer will have a high processing load for upper level design courses and ample available processing and storage is recommended. Macintosh computers are available through APPLE at discounted prices for students.

It is also recommended that students purchase an external portable hard drive for backing up files and projects.
